ABSTRACT

This music education guide, for use in grades 4-6, is one of a series of guides, K-12, that were developed by teachers to help introduce environmental education into the total curriculum. The guides are supplementary in design, containing a series of episodes (minilessons) that reinforce environmental concepts and theories by developing ecology-related aesthetic values. The episodes are built around 12 major environmental concepts that form a framework for each grade or subject area, as well as for the entire K-12 program. Although the same concepts are used throughout the K-12 program, emphasis is placed on different aspects of each concept at different grade levels or in different subject areas. This guide focuses on aspects such as music appreciation and listening. Most of the 12 concepts are covered in one of the episodes contained in the guide. Further, each episode offers subject area integration, subject area activities, interdisciplinary activities, cognitive and affective behavioral objectives, and suggests references and resource materials useful to teachers and students. PREFACE

Music as an art form best serves the purposes of ecology by developing in the students, ecology-related aesthetic values. The music program as a reinforcement of the concepts, theories, and practical applications taught in other subjects provides a further service to the cause of ecology.

The music teacher must have an awareness of, a desire to become involved in, and a realization of the urgency of ecological concerns. These lesson plans and episodes are suggested avenues to be explored. Further, our hope is that teachers avoid a contrived use of this guide, but, rather, let it stimulate thinking and serve as both a reference point and a point of departure for music and classroom teachers.

For us, music is a vocation. For many, it is an avocation or non-polluting activity, depleting little or none of our natural resources while offering satisfaction for deeper human needs.

FORWARD TO PROJECT I-C-E ENVIRONMENTAL EDUCATION GUIDES

In 1969, the First Environmental Quality Education Act was proposed in the United States Congress. At the time of the introduction of that legislation, I stated:

"There is a dire need to improve the understanding by Americans of the ominous deterioration of the Nation's environment and the increasing threat of irreversible ecological catastrophe. We must all become stewards for the preservation of life on our resource-deficient planet."

In the three years since the Environmental Education Act was passed by the Congress, much has happened in the United States to reinforce the great need for effective environmental education for the Nation's young people. The intensive concern over adequate energy resources, the continuing degradation of our air and water, and the discussion over the economic costs of the war against pollution have all brought the question of the environmental quality of this nation to a concern not merely of aesthetics but of the survival of the human race.

The intense interest by the public in the quality of our lives

as affected by the environment clearly indicates that we cannot just use incentives and prescriptions to industry and other sources of pollution. That is necessary, but not sufficient." The race between education and catastrophe can be won by education if we marshal our resources in a systematic manner and squarely confront the long-term approach to saving our environment through the process of education.

As the incessant conqueror of nature, we must reexamine our place and role. Our world is no longer an endless frontier. We constantly are feeling the backlash from many of our ill-conceived efforts to achieve progress.

Rachel Carson's theme of "reverence for life" is becoming less mystical and of more substance as our eyes are opened to much of the havoc we have wrought under the guise of progress. A strong commitment to an all-embracing program of environmental education will help us to find that new working definition of progress that is a pre-requisite to the continued presence of life on this planet.

- Senator Gaylord Nelson

The interest and dedicated effort of the following teachers from Wisconsin Area "B" has led to the development of the Project I-C-E Environmental Education K-12 series:

D. C. Aderhold, Bonduel

DIRECTIONS FOR USING THIS GUIDE

- This guide contains a series of episodes (mini-lesson plans), each containing a number of suggested in and out of class learning activities. The episodes are built around 12 major environmental concepts that form a framework for each grade or subject area, as well as for the entire K-12 program. Further, each episode offers subject area integration, multidisciplinary activities, where applicable, both cognitive and affective behavioral objectives and suggested reference and resource materials useful to the teacher and students.
1. This I-C-E guide is supplementary in design--it is not a complete course of study, nor is its arrangement sequential. You can teach environmentally within the context of your course of study or units by integrating the many ideas and activities suggested.
 2. The suggested learning activities are departures from regular text or curriculum programs, while providing for skill development.
 3. You decide when any concepts, objectives, activities and resources can conveniently be included in your unit.
 4. All episodes can be adapted, modified, or expanded thereby providing great flexibility for any teaching situation.
 5. While each grade level or subject area has its own topic or unit emphasis, inter-grade coordination or subject area articulation to avoid duplication and overlap is highly recommended for any school or district seeking effective implementation.
- This total K-12 environmental education series is the product of 235 classroom teachers from Northeastern Wisconsin. They created, used, revised and edited these guides over a period of four years. To this first step in the 1,000 mile journey of human survival, we invite you to take the second step--by using this guide and by adding your own inspirations along the way.

PROJECT I-C-E TWELVE MAJOR ENVIRONMENTAL CONCEPTS

1. The sun is the basic source of energy on earth. Transformation of sun energy to other energy forms (often begun by plant photosynthesis) provides food, fuel and power for life systems and machines.
2. All living organisms interact among themselves and their environment, forming an intricate unit called an ecosystem.
3. Environmental factors are limiting on the numbers of organisms living within their influence. Thus, each ecosystem has a carrying capacity.
4. An adequate supply of clean water is essential to life.
5. An adequate supply of clean air is essential for life.
6. The distribution of natural resources and the interaction of physical environmental factors greatly affect the quality of life.
7. Factors such as facilitating transportation, economic conditions, population growth and increased leisure time influence changes in land use and population densities.
8. Cultural, economic, social, and political factors determine man's values and attitudes toward his environment.
9. Man has the ability to manage, manipulate and change his environment.
10. Short-term economic gains may produce long-term environmental losses.
11. Individual acts, duplicated or compounded, produce significant environmental alterations over time.
12. Each person must exercise stewardship of the earth for the benefit of mankind.

A "Concept Rationale" booklet and a slide/tape program "Man Needs His Environment" are available from the I-C-E RMC to more fully explain these concepts.

1. Sail-ing down my dir-ty stream. Still I love it and I'll keep the

Dream - That some-day soon, but may-be not this year - the Hud-son Ri-ver - will once a-gain run

clear. It starts high in the moun-tains of the North. Crystal clear and i-cy trick-ling

forth, with just a few float-ing wrappers of chewing gum - dropped by some hikers - to warn of things to

TRANSCRIBED FROM RECORD AVAILABLE
in "No Time to Waste" available through CESA*9

Come.

2. At Glen Falls, five thousand honest hands
Work at the consolidated paper plant;
Five million gallons of waste a day,
Why should we do it any other way?
Down the valley, one million toilet chains
Find my Hudson a convenient place to drain.
And each little city says "Who me?"
"Do you think that sewage plants come free?"

3. Out in the ocean they say the water's clear,
But our homes are in the city here;
Halfway between the mountains and the sea,
Travelin' to and fro, this thought returns to me:
We went sailing down my dirty stream.
Still I love it and I'll keep the dream
That some day soon, but maybe not this year,
The Hudson River will once again run clear.

"THINK ABOUT YOUR TROUBLES" *

by NILSSON

Sit be-side the break-fast ta-ble, think a-bout your trou-bles. Pour your-self a cup of tea, then

think a-bout the bub-bles, You can take your tear-drops and drop'em in a tea-cup, take 'em

down to the ri-ver side and throw'em o-ver the side, to be swept up by the cur-rent, then

ta-ken to the o-cean to be eat-en by some fish-es who were eat-en by some fish-es and swal-lowed by a

whale who grew so old — he de-com-posed — He died and left his bo-dy at the bot-tom of the

o-cean. Now, ev-'ry-bo-dy knows that when a bo-dy de-com-poses, the ba-sic el-e-ments are giv-en

back to the o-cean, And the sea does what it ought-a, as soon as sal-ty wa-ter, which is not too good for

drink-in', cause it tastes just like a tear-drop, So we run it through a fil-ter, And it comes out from a fan-ct, where it

pours in-to a tea-pot, which is just a-bout to bub-ble. Now... think a-bout your troubles, oo

Co.

"DOWN WITH POLLUTION"

suggested lyrics

29

A-mer-i-ca has a big prob-lem to-day. Her fac-tories dis-pose of their waste in lakes and streams and riv-ers once blue. Now na-ture's de-part-ing with haste. (chorus:) Down with pol-lu-tion, OH down with pol-lu-tion, OH Down with pol-lu-tion to-day, to-day! Down with pol-lu-tion, OH down with pol-lu-tion, OH save great A-mer-i-ca.

ALTERNATIVE VERSE FOR THE GREEN BAY AREA:

Pollution is here, so take a deep breath,
 And smell the odor so strong,
 It comes from the Fox, it comes from the Bay,
 And paper mills all over town.

Down with pollution, oh, down with pollution,
 Oh, down with pollution today, today,
 Down with pollution, oh, down with pollution,
 And save the Fox and Green Bay!

"WHAT HAVE THEY DONE TO THE RAIN?"*

ly - Melvina Reynolds

30/31

(Verse:) 1. Just a lit-tle rain, fall-ing all a-round, the grass lifts its head to the

heav-en-ly sound; Just a lit-tle rain, — Just a lit-tle rain,

what have they done to the rain? (Chorus:) Just a lit-tle boy, stand-ing in the rain, the

gen-tle rain that falls for years; And the grass is gone, the boy dis-ap-pears, And

rain keeps fall-ing like help-less tears, and what have they done to the rain? —

2. Just a little breeze, out of the sky,
The leaves nod their heads as the breeze blows by.
Just a little breeze with some smoke in its eye.
What have they done to the rain? (chorus)

CONCEPT NO. 7 - Land Use

SUBJECT Music/Social Studies

ORIENTATION Man vs. Machine

TOPIC/UNIT Industrial Impact on Environment

BEHAVIORAL OBJECTIVES

STUDENT-CENTERED LEARNING ACTIVITIES

Cognitive:

Describe the conflict found in the song.

In-Class:

Outside or Community:

A. Use of a song to implement history.

1. Teacher introduces Concept #7 through the social studies class. Emphasize the industrial revolution and its impact on the quality of our lives.

a. Learn the song "John Henry"

b. Discuss the conflict of man and the machine as brought out in the song.

Affective:
Associate economic and industrial changes with changes in life style and life quality.

Skills Used:

1. Tone matching.
2. Effective discussion.

(Questions: Who was John Henry? What was the contest? Why did he want a contest? What did he want to prove? Who won? What did that prove? If John had won and not died, what would that have proved? How would our history have been different?)

BEHAVIORAL OBJECTIVES

STUDENT-CENTERED LEARNING ACTIVITIES

Cognitive:

Identify the difference that changes in the music produce and will be able to initiate changes himself.

In-Class:

Outside or Community:

Affective:

Accept that a direct and measureable result occurs when he changes his environment.

Skills Used:

1. Discriminative listening.
2. Playing simple tunes.

A. Students select a song or melody that they know or like well.

A. Band and orchestra teachers as resource people.

1. Teacher selects a couple of these songs as examples and plays the melody (on piano, bells or guitar.)

2. To show how easily a song can be changed, teacher plays the same melody in its parallel minor (or P. maj. if the song is min.) key, impressing upon the students that only one or two notes are being changed.

3. Write a simple tune (Mary had a little lamb, for example) on the board.

4. Change either a note (to a rest) or a rest (to a note). Play the tune both ways to illustrate the effect of a single or simple change.

"WATER POLLUTION"

BEST COPY AVAILABLE

Words by - Dave Peterson

1. Hea-vens A-bove! As ev-'ry-one knows, our H-2-OH Don't smell like no rose.

We all a-gree there's plenty of slime— but no one knows who's guilty of the grime. Now

ev-'ry one's af-ter the per-fect sol-u-tion, 'cause they've

heard there's a prob-lem called wa-ter pol-lu-tion. Ev-'ry-bo-dy:

wa-ter pol-lu-tion [sing a little louder] wa-ter pol-lu-tion [sing out the chorus]

wa-ter pol-lu-tion, it wastes my mon-ey and makes me throw up!

2. The purest of water is used in our beer,
But no one believes they got it from here.
Our water may look the color of booze,
But who would dare to drink that awful ooze?
So everyone's desperate for the perfect solution
'Cause they've heard there's a problem called water pollution.
Everybody: Water pollution (can't see the fish now)
Water pollution (scum on the beaches)
Water pollution; it wastes my money and makes me throw up!
3. Now where oh where can the answer be found?
Just seems like the arguments go 'round and 'round.
We must find a way and act in haste
Or we'll be up to our glasses in the waste.
For our water is far from the perfect solution
And we may have a problem called water pollution.
Everybody: Water pollution (swim in the sewage)
Water pollution (put it on your toothbrush)
Water pollution, it wastes my money and makes me throw up!

GALICO CAT * 48/49

1. "I," said the wise old Cal-i-co Cat - "I'll tell you the rea-son that, the rea-son that the day - is night. 'Cause fac-tory smoke has put out the light. Aye diddle Aye dee id-dle um day, Aye id-dle Aye dee id-dle um dare Aye Dee Aye You bet-ter be-ware, or man will van-ish in-to thin air

**Transcribed from Recording available in Kit "No Time to Waste"*

2. "I" said the salmon, with a flipper and a shiver,
 "Quit dumping your garbage into my river,
 "I bumped my tail on a soda-pop can.
 "And my house is a sewer, because of man.
 "Aye iddle aye dee iddle um day; Aye iddle aye dee iddle um down;
 "Aye dee aye dee iddle um down;
 "I'm swimmin' up stream, but you're bringin' me down."
3. "I" said the whale with a whale of a tale,
 "I propose men be put in jail
 "For pollutin' the ocean, pollutin' the soil,
 "And huntin' me down for blubber and oil,
 "Aye iddle.....
 "Aye dee aye dee iddle um doe;
 "If man murders the earth,...there's no place to go."
4. "I" said the leopard with a sob in his throat,
 "When they look at me, they see a coat.
 "They killed all my fam'ly except for a few;
 "And what was left, they put in a zoo.
 "Aye iddle.....
 "Aye dee aye dee iddle um dive;
 "I'll never get out,...of this skin alive."
5. "I" said the little boy, up a tree.
 "Have you all forgotten me?
 "If I save you, I'll save me too.
 "You wouldn't harm me, why should I harm you?
 "Aye iddle.....
 "Aye dee aye dee iddle um dee;
 "If it's up to man...it's up to you and me."

"GARBAGE" *

BEST COPY AVAILABLE

50/51

1. Mis-ter Thompson calls the waiter, or-ders steak and baked po-ta-to, Then he

leaves the bone and gris-tie and he ne-ver eats the skin. The bus-boy come and takes it; with a

cough, con-ta-min-ates it; and he puts it in a can with cof-fee grounds and sar-dine tins. 'til the

truck comes by on Fri-day and it carts it all a-way - And a thou-sand trucks just like it are con-

ver-ging on the Bay. (Chorus) Gar-bage (gabbage, gabage, gabage) Gar-bage (gabbage, gabage) We're filling up the

sea/air with Gar-bage (gabbage.....) Gar-bage (gabbage.....) what will we do when there's

no place left to put all the Gar-bage? What will we do when there's no-thing left to

hear, and there's no-thing left to wear, and there's no-thing left to need, and there's no-thing left to

talk a-bout and there's no-thing left to walk up-on and no-thing left to care a-bout and

no-thing left to do, and no-thing left to see, and no-thing left to be but Gar-bage!

2. Mister Thompson starts his Cadillac and winds it up the freeway track
 Leaving friends and neighbors in a hydro-carbon haze.
 He's joined by lots of smaller cars, all sending gasses to the stars,
 There to form a seething cloud that hangs for thirty days
 While the sun looks down upon it with its ultra-violet tongues,
 Till it turns to smog and settles down and ends up in our lungs.
 (chorus)
3. Getting home and taking off his shoes, he settles down with the evening news,
 While the kids do homework with the TV in one ear;
 While superman for the thousandth time sells talking dolls and conquers time,
 They dutifully learn the date of the birth of Paul Revere.
 In the paper there's a piece about the Mayor's middle name,
 And he gets it done in time to watch the all-star bingo game.
 (chorus--this time sing "We're filling up our minds with garbage.")

"GEE-I'M-LOOKING-FORWARD"

"Up With People" (PACF publ.)

"OH CANCEROUS" (tune of "America the Beautiful")

Oh cancerous for smoggy skies
For pesticided grain.
Irradiated mountains rise
Above the asphalt plain.

America, America, thy birds have fled from thee
Thy fish lie dead by poisoned streams
From sea to fetid sea.

Oh plundered are thy guardian woods
Where silver brooklets flowed.
Thy gullies clogged with cast off goods
Thy barren hills erode.

America, America, no sunshine comes to thee
But bakes thy barren topsoil dry
No wind but blows it free.

Relentless as thy bankers greed,
That for each westward tie
A gandy dancers corpse decreed
Beside the tracks must die.

America, America, thy sins prepare thy doom.
Monoxide cloud shall be thy shroud
And cities be thy tomb.

66/67

"POLLUTION" *

ly - Tom Lehrer

68/69

1. If you vi-sit A-mer-i-can ci-ti, You will find it
 ve-ry pret-ty. Just two things of which you must be-ware: ——— Don't drink the
 wa-ter and don't breathe the air. Pol-lu-tion, Pol-lu-tion, they got smog and
 sew-age and mud, Turn on your tap and get hot and cold run-ning crud.
 slaugh-ter... They're drink-ing the wa-ter— and breath-ing (cough...) the
 air. ———

* Transcribed from recordings by Tom Lehrer

2. See the halibuts and sturgeons
 Being wiped out by detergeons.
 Fish gotta swim and birds gotta fly,
 But they don't last long if they try.
 Pollution, pollution, you can use the latest toothpaste,
 And then rinse your mouth with industrial waste.
3. Just go out for a breath of air,
 And you'll be ready for Medicare,
 The city streets are really quite a thrill,
 If the hoods don't get you the monoxide will.
 Pollution, pollution, wear a gas mask and a veil,
 Then you can breathe long as you don't inhale.
4. Lots of things there that you can drink,
 But stay away from the kitchen sink,
 Throw out your breakfast garbage, and I've got a hunch,
 That the folks downstream will drink it for lunch.
 So go to the city, see the crazy people there,
 Like lambs to the slaughter,
 They're drinking the water and breathing (cough) the air.
